Exercise ∞:

Wrapping Up CHIRON

Before you finish, take a moment to reflect on your CHIRON experience—what you noticed, what challenged you, and what you want to carry forward.

Step 1: Re-Take the Trustworthiness Calculator

Revisit the Trustworthiness Calculator (or take it for the first time if you missed the intro exercise). Find it on chiron.synapse.org.

Discuss:

1. What (if anything) has changed in your score, or your thinking?
2. Are there areas where your awareness or confidence has grown?

Step 2: Review Past Reflections

If you've been filling out the Reflection Worksheets after each exercise, skim back through them now.

Discuss:

3. Looking back, have any of your reflections from earlier exercises taken on new meaning or shifted in light of later discussions?
4. Which ideas or exercises challenged your thinking the most? Why?
5. What concepts or practices from CHIRON do you feel most ready or excited to apply in your work?
6. Is there anything you still feel uncertain about or want to keep exploring?

Next Steps

That's it. You've completed CHIRON. Whether you did one exercise or all of them, thank you for thinking critically about your role in shaping ethical, effective research.

Where to go from here:
